## #ABOUT US

### NATURE REIMAGINED

*LiveTouch Laminate is where design meets sensation a brand born to redefine the way surfaces feel, look, and live. Every sheet we craft carries the essence of innovation, artistry, and elegance, designed to inspire modern interiors with a timeless touch. We believe that a surface is more than just material — it's an experience. From soft matte to high gloss, from natural wood grains to abstract textures, each laminate is created to enhance the emotion of every space it touches. Driven by creativity and backed by advanced technology, LiveTouch stands for durability, precision, and design perfection.*

*Our products bring harmony between function and beauty, making them ideal for homes, offices, and architectural spaces that demand both luxury and longevity.*

## #OUR VISION

### NATURE REIMAGINED

*We are a company that offers the best quality and design in the Indian market. Our goal is to always earn our customers' trust and provide them with something new.*

*To create surfaces that speak through texture, reflect through design, and last through time — delivering a living touch in every environment. Our Promise*

Whisper Stories of Earth

### MARBLE

#collection

Sculpted by the Earth,  
Perfect for Living

### SOLIDS

#collection

The Art of Strength,  
Refined Through Form

FEEL THE DESIGN  
LIVE THE TOUCH

## KEY FEATURES

### #ZERO WOOD

Zero finish laminate refers to a premium laminate with a completely matte and texture-free surface, offering a natural, seamless appearance. It is designed to mimic materials like wood, stone, or solid colors with a realistic, non-glossy finish.

### #SYNCHRO

Synchronized laminates are advanced decorative laminates that feature a unique embossing process where the texture perfectly matches the printed design, creating an authentic, natural look and feel. This process is achieved through precise technology, known as embossing in register (EIR), where the surface texture is synchronized with the printed grain patterns, knots, or veins of materials like wood or stone.

### #ZERO MARBLE

Zero Finish Marble refers to a high-quality laminate that replicates the look of marble with a zero-reflective surface. It has an ultra-matte finish, offering a smooth, natural, and realistic marble appearance.

Properties	Specified Values As Per IS 2046-1995	Conforms
Product	High Pressure Decorative Laminated Sheets	✓
Size	2440mm x 1220mm (8 x 4 ft.)	✓
Thickness	1mm (±10%)	✓
Resistance to surface wear	350 (Revolution)	✓
Resistance to immersion in boiling water		
-Mass Increase (%)	10.0 Max.	✓
-Thickness Increase (%)	11.8 Max.	✓
Resistance to dry heat 180° C	Not worse Than 4	✓
Dimensional stability at deviated temperature		
-Longitudinal (%)	0.5 Max.	✓
-Transverse (%)	0.9 Max.	✓
Dimensional stability at 20° C		
-Longitudinal (%)	0.375 Max.	✓
-Transverse (%)	0.60 Max.	✓
Resistance to impact by small diameter ball	20N Min.	✓
Resistance to Cracking	Not wore than 4	✓
Resistance to scratching	2N Min.	✓
Resistance to Staining	Not worse than 5	✓
Resistance to colour change (wool standards)		
-In Xenon arc light	Not worse than 6	✓
- In enclosed Carbon arc light	Not worse than 5	✓
Resistance to cigarette burns	Not worse than 3	✓
Resistance to steam	Not worse than 4	✓
Appearance	Should be free from foreign particles	✓

All testes may not valid for embossed & metallic laminates.

- Product** : High Pressure Decorative Laminated Sheets  
**Size** : 2440mm x 1220mm (8 x 4 ft.)  
**Thickness** : 1mm (other thickness available on request)  
**Quality Standard** : Imported Design base paper are used  
 Use of best quality kraft paper.  
 Use of 100% melamine resin and 100% phenolic resin.  
 Use best chemicals and raw material for better flexibility & durability.
- Limited Warranty** : warrants that its products are reasonably free from manufacturing defects. The products when properly used will comply, with normal deviations, to related manufacturing specification. It excludes damage resulting from accidents, abuse or lack of Care, improper used and / or any alternation. It is recommended that the product must be inspected prior to installation and our liability will be limited to the extent of the cost of the product only. Laminates are used for various applications, without possibility of control over the manufacturing of the finished product. The company does not assume obligations or liabilities arising from the furnishing, sale, installation or repair, use or subsequent sale of any products, to any person or entity.
- Care & Maintenance** : Cleaning should be carried out with a soft moist cloth and warm solution. Do not use Detergents containing abrasive particles or excess soda.
- Note**
- Samples presented are indicative of colour, pattern and surface finish but not of actual thickness. High gloss sheets are recommended for vertical application only.
  - Finishes other than shown here will be available on request
  - Laminates provides only replacement of the product if any manufacturing fault occurs. No replacement guarantee will be given if any application or handling mistake is done by the carpenter. Also company is not liable for fevicol and plywood replacement if any problem occurs in pasting laminates.
- Direction To Use**
- Before using the laminate, ensure that the surface of plywood and laminate is clean, dry, leaved and free of oils, excess moisture or other contaminants, such as dust, synthetic particles etc.
  - The adhesive should always be stirred before use. Sufficient adhesive should be applied on either or both of the surfaces to be bonded. Don't add water to the adhesive, it makes the bonding weak.
  - Once the adhesive applied is tacky in nature (usually requires 5-10 minutes, depending on atmospheric conditions), the laminate should be placed on the surface, accurately aligned.
  - Sufficient bonding pressure to ensure intimate contact necessary for an adequate bond should be applied over the entire area using as much pressure as possible without damaging the assembly. Pinch (rotary press) and heavy weighted rollers are ideal. Hand rolling should be done from the center to the edges to ensure the removal of all air bubbles. The edges should be rolled twice.
  - For satisfactory bonding, the area in question should be kept under pressure for a period of 12-18 hours (depending on atmospheric conditions).
  - In rainy season or when humidity is too high, moisture may-condense on the surface during drying (known as "blushing") and will prevent an acceptable bond. Hot spray or forced air drying may be used to help prevent this condition.
  - It is recommended that the maximum sheets size used for vertical field application be limited to 610 x 2440mm (2 x 8 ft) larger panels are required, these should be fabricated in the shop.
  - When laminate is pasted vertically, maintain uniform pressure on all sides till adhesive is dried.
  - To avoid stress cracking, avoid making cut outs having sharp and rough edges.
  - A gap of minimum 2mm should be maintained between two laminates, while pasting side by side.

**NO CLAIM WILL BE ENTERTAINED FOR AIR BUBBLES**

**NO CLAIM WILL BE ENTERTAINED FOR CRACKING ARISING OUR OF GROOVE CURRYING OR L-SHAPE**
